ABSTRACT OF THE DISCLSOURE

The present invention relates to a compound represented by formula (I):

$$X \xrightarrow{5} N \xrightarrow{2} N \xrightarrow{NHR^{1}} R^{3}$$

$$Y \xrightarrow{5} N \xrightarrow{3} NHR^{2}$$

$$Y \xrightarrow{1} N \xrightarrow{3} NHR^{2}$$

$$(I)$$

in which at least one of R³ and R⁴ is a group represented by formula (A):

where the structural variables are as defined herein. The compounds are useful for blocking sodium channels.
